DETAILED ACTION

Drawings

Figures 1-12 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-21 recite the limitation "**The** invention" in line 1. There is insufficient antecedent basis for this limitation in the claim. "**The** invention" should correctly be --the method--.

Claims 21-46 recite the limitation "**The invention**" in line 1. There is insufficient antecedent basis for this limitation in the claim. "**The invention**" should correctly be --the apparatus--.

Claims 47-56 recite the limitation "**The invention**" in line 1. There is insufficient antecedent basis for this limitation in the claim. "**The invention**" should correctly be --the method--.

Claims 57-66 recite the limitation "**The invention**" in line 1. There is insufficient antecedent basis for this limitation in the claim. "**The invention**" should correctly be --the apparatus--.

Claims 1, 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear which so called "index generator" and "index adjuster" from the drawing/specification.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-36, 41-66 are rejected under 35 U.S.C. 102(e) as being anticipated by Vella-Coleiro (20040264596) or (U.S. Application No. 10/607,924).

Regarding claim 1, 22, 47, 57 Vella-Coleiro (Fig. 1) a digital pre-distortion circuit comprising: an index calculation table (28) can be read as an index generator; a processing module (32) can be read as an index adjuster; a look-up table (30); and a pre-distorter (12) having the functions thereof (see [0018] for polynomial equation, [0033]).

Regarding claims 2-21, 23-36, 41, 42, 45, 46, wherein the operational characteristics of the circuit is inherently seen in the reference circuits (Figs. 1-7).

Regarding claims 43, 44, wherein Vella-Coleiro (Fig. 5) comprises multiple look-up tables and a processor can be read as a controller having the function thereof (see [0033]).

Regarding claim 48-56, 58-66, wherein the operational characteristics of the circuit is inherently seen in the reference circuits (Figs. 1-7).

Allowable Subject Matter

Claims 37-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 37-40 call for, among others, a second detector and a receiver having the functions thereof.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional reference (Wright et al. (6,459,334)) shows further analogous prior art circuitry predistortion parameters.
